

## Tellus Workshop

### Information

At the workshop we will go through the system. The operators, administrators and the trainer will go over the different parts and discuss how the system can be used for the specific customers needs.

### Length

Approximately 3 hours, but this can be changed if there is a need to do that.

### Objectives

The goal with this workshop is that both administrators and operators shall have a good idea of what functions they have to work with and how the functions can help them in their daily work.

### Where

The course will be held at SourceTech, Vretenvägen 6 in Solna, Stockholm.

*Detailed directions are found on the last page of this document.*

The course can also be held on site, cost for lodging, transportation and subsistence will be added.
